Precis

Our aim in the Mitsubishi Electric Group is to be a “Circular Digital-Engineering” company, and we are working to solve increasingly severe and diverse social problems through innovation based on advanced digital technology. In this way, we hope to contribute to the realization of a dynamic, yet relaxed and fulfilling society. For this special feature, we will present specific initiatives in the area of advanced digital technology across two issues: a first part (this issue, ADVANCE Vol. 188, December 2024) and a second part (the next issue, Vol. 189, March 2025).
